

AAKHYA CHHAUHAN

Computer Science Student | Full-Stack Developer | Cybersecurity & AI/ML Enthusiast

+91 8368773662 • aakhya.chhauhan@gmail.com • Ghaziabad, Uttar Pradesh • <https://www.linkedin.com/in/aakhya-chhauhan-13565428a/> • <https://github.com/AaakhyaChhauhan>

PROFESSIONAL SUMMARY

I am a B.Tech Computer Science student at NIIT University with hands-on experience in full-stack web development, AI/ML, and cybersecurity. Proficient in the **MERN Stack**, **Docker**, **Jenkins**, **JavaScript**, **Database Management**, **Database Security**, and **Cryptography**. Built production-grade projects including a Zero Trust access control engine and an AI-powered deepfake detection system. Strong communicator with leadership experience in content and event management.

TECHNICAL SKILLS

Languages: Python, C, C++, Java (Basic), PHP, JavaScript

Web & Frameworks: HTML, CSS, React.js, Node.js (Express), PHP, REST API

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Docker Compose, Jenkins, GitHub Actions (CI/CD), GitHub, VS Code, XAMPP

Security & Monitoring: OSQuery, Nmap, Zero Trust Architecture, RBAC

AI/ML & Data: TensorFlow, PyTorch, OpenCV, CNN (ResNet/Xception), Google Apps Script

PROFESSIONAL EXPERIENCE

Full Stack Development Intern | *Steel Authority of India Ltd, Delhi*

July 2025 – August 2025

- Built an Invoice Management System using **PHP**, **HTML**, **CSS**, and **Python** to automate invoice generation, record management, and verification workflows.
- Integrated backend logic in **PHP** for dynamic data handling; used **Python** scripts for data validation and report automation.
- Designed and developed web pages for invoice entry and verification, reducing manual processing time by 40%.
- Collaborated with a cross-functional team to streamline workflows and improve data accuracy.

Summer Intern | *COEET*

June 2023 – July 2023

- Developed automation scripts using **Google Apps Script** to simplify data handling and form response management.
- Mentored students in LTA projects, guiding topic selection and providing technical support throughout development.

Content Lead | *IngeNUity (Core Team)*

- Led and managed the content creation team, coordinating with departments for university-wide events and communications.

Content Lead | *siNUoid (Tech Fest)*

- Directed the content team for the annual tech festival, ensuring thematic, cohesive, and on-brand content delivery.

Digital Marketing Desk | *TEAM COEET*

- Managed digital marketing projects and created pedagogic innovations using industry-linked academic approaches.

PROJECTS

ZeroIAM – Automated Trust Scoring Engine (*Capstone Project*)

- Built a **Zero Trust**-based access control system using **React.js**, **Node.js (Express)**, **Python**, and **MongoDB**.
- Designed a trust scoring model (0–100) based on device health factors: firewall status, antivirus activity, OS updates, and network port safety via **OSQuery** and **Nmap**.
- Implemented **RBAC** with dynamic decision policies (Allow / MFA Required / Block) for secure access enforcement.
- Containerized using **Docker** and **Docker Compose**; set up **CI/CD** pipelines via **GitHub Actions** for automated deployment.

FORENSIC-AI – Deepfake Detection System *(R&D Project)*

- Developed an AI-based deepfake detection system for video and audio authentication in digital forensics applications.
- Implemented deep learning models using **CNN** architectures (**ResNet/Xception**) with **transfer learning** via **TensorFlow/PyTorch**.
- Evaluated across **FaceForensics++**, **Celeb-DF**, and **DFDC** datasets; applied forensic metrics including **AUC**, **HTER**, and Likelihood Ratio for court-admissible analysis.

Home-Based Monitoring System using Alexa & Arduino

- Built a voice-controlled home automation system integrating **Python**, **Arduino**, and **Alexa** Voice Assistant.
- Used **ESP8266 (Wi-Fi Module)** for device connectivity; implemented real-time **IoT** control tested via **Alexa** Developer Console and **Arduino** IDE.

Vendor Invoice Management System

- Developed a web-based system using **PHP**, **HTML**, **JavaScript**, and **Python** featuring a chatbot, role-based access controls, and an interactive dashboard.
- Tested with **XAMPP** Server; automated financial record-keeping and reduced manual processing time by 40%.

EDUCATION

B.Tech, Computer Science

2023 – 2027

NIIT University, Rajasthan

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Development, Operating Systems, Computer Networks, Artificial Intelligence, Cybersecurity

Class XII (CBSE) – Somerville School, Vasundhara Enclave

2023

Class X (CBSE) – Somerville School, Vasundhara Enclave

2021

CERTIFICATIONS

- Deloitte Australia – Cyber Job Simulation (June 2025)
- Coding Battle Certificate (January 2025)
- Design Dojo – 2nd Position, siNUsoid (November 2025)

ACHIEVEMENTS & ACTIVITIES

- 1st Place – Zonal Football Tournament at NVPS
- Runner-Up – Zonal Classical Dance Competition
- Winning Team – Audacity '23 and Audacity '25
- Winners – FUTSAL Tournament

LANGUAGES

English (Proficient) • Hindi (Proficient) • Sanskrit (Proficient)
